Dear Friends,

The summer of 2011 brought record-breaking temperatures across much of our region, consequently I had the pleasure of seeing many folks that I hadn't seen in a while. I appreciate everyone's patience during this very busy time.

Due to increasing tax and regulatory burdens, you may notice that I have "administratively" re-located my business to Henry County Missouri. My hope is that this will allow me to redirect my energy towards serving you. Please note that I continue to reside in Kansas City.

Although strongly opposed by many in the industry, the Federal Government has now enacted Regional Energy Efficiency Standards. These standards are slated to take effect in early 2013. Uninformed consumers could face stiff penalties for failure to comply with these new mandates. For more information, you can go to www.achrnews.com and enter "HARDI, ACCA Fight DOE" in the search bar. Feel free to call me with any specific questions.

It is now more important than ever to have your heating and air conditioning system, cleaned and checked to ensure that it is operating safely, efficiently and within its manufacturer's specifications. Money spent now may pay big energy dividends and reduce future repair costs.

Please note that although every service procedure involves a system check, a complete inspection involving cleaning, tuning, and balancing is typically not included.

I am always available to answer your questions and to help meet your indoor comfort needs. I appreciate your referrals and look forward to seeing you in the future.

John Vasant
